

TUNAHAN IPEK

Profile

I am an experienced Full Stack and Frontend Developer who pays attention to details and aims to develop user-oriented solutions. I specialize in developing dynamic and scalable web applications using modern JavaScript frameworks such as Next.js, React.js, Vue.js and Svelte. With my knowledge of design tools and database management, I aim to provide aesthetic and functional solutions.

Work experience

Apr 2025 - Dec 2025

AYHANLAR HOLDİNG - İşin Olacak

- *Software Team Lead - 7 months*
- *Full-Stack Developer - 9 months*

Software Team Lead & Full-Stack Developer

- Led the development team in building scalable web and mobile solutions using Next.js, React Native, NestJS, TailwindCSS, Redux, and GraphQL.
- Managed the software development lifecycle, ensuring high code quality and the implementation of modern architectural standards as a Team Lead.
- Developed and managed cross-platform mobile applications using React Native, focusing on user-centric performance and interface consistency.
- Optimized complex state management workflows using Redux to enhance application stability and predictability.

Aug 2024 - Sep 2024

Gezer Grup İnsan Kaynakları

Frontend Web Developer

Nov 2022 - Jul 2024

Rubiklabs Yazılım Bilişim San. ve Tic. Ltd. Şti.

Fullstack Software Developer

I started working as a FullStack Developer at Rubiklabs. I was in the role of an experienced frontend developer developing modern and performance-oriented frontend projects with a focus on user experience.

- Generally, I worked on Front-end with using React, Next.js, Vue.js, Svelte, TailwindCSS.
- I am creative to designing in projects.
- I provided fast and effective UI solutions using PrimeReact component library.
- I worked in collaboration with the UI/UX design team and implemented user-oriented projects.

- I have produced projects that comply with SEO and accessibility focused development standards.
- I contributed to the details of the code and usage of Git in the team.
- I supported my team in projects developed with Nestjs and Nodejs in the backend.
- GraphQL and Postgresql were used on the database side.
- The technologies we use are jaeger, minio, rabbitmq, redis etc.

2019-2023

Software Developer (Freelancer)

I worked as a freelancer until join to Rubiklabs Software Company. I have developed customized web applications for various customers and offered solutions to user needs.

- I'm good at creating designs.
- I designed modern and user-friendly interfaces with Tailwind CSS and Figma.
- I can convert designs made with figma into code.
- I managed the frontend and backend parts of the projects using technologies such as Next.js, Nestjs, NodeJs, React.js, Vue.js and Svelte.
- E-commerce Web Application: I helped develop a full-fledged e-commerce platform using React.js and Node.js.
- Specializing in developing personal websites, I have strengthened the digital presence of individual clients.
- I designed and developed a custom website for a barber shop using React.js, React Native, Flutter, Tailwind CSS, GraphQL, Figma.
